Gun metal
PVD finish

Stainless
steel

Dishwasher
safe

PVD is an advanced technology application, used in aerospace and biomedical applications, where various shades of surface colour can be obtained that are both non-toxic and biocompatible. The product with such a finish is scratch resistant, guaranteed dishwasher safe, does not mark, and is resilient to everyday use. The colours of these items remain unchanged in time, making them a perfect choice for the table, as well as for normal daily use in hotels and restaurants.
